# About us

With over 25 years' experience Red Box Tools design specialist tool kits and offer a selection of over 35,000 tools. Calling on experience and input from a large selection of engineers and tradesman.

All of our tool kits are designed to offer a complete solution to our customers, using the highest quality BAHCO, Facom, and Draper tools provided with a lifetime guarantee, with each tool embedded in Skydrol resistant foam giving you a complete tool solution system.

Simply put, our tool kits and tool cabinets are the most convenient & economical way to purchase a complete tool system. As well as offering Tool kits and Tools we also offer an etching service, enabling our customers to code each tool for additional tool control.

If you have all the tools but need tool control, we offer a Shadow Foaming® service. We can embed all of your tools into tool control foam, fit to any case and etch all of your tools.

# Shadow Foaming® for your existing tools

If you have all of the tools you need but they are never quite tidy enough, we have the perfect solution for you... Shadow Foaming®.

Red Box offer a complete Shadow Foaming® service. We take your tools, scan them, we then lay them out in specially designed, 2 colour, routed foam. We can offer solutions for your mobile tool kit, garage, business, or anywhere where tool storage and control is of importance.

**It's easy to do and you can do one of three things.**

- 1.** Bring the tools to us
- 2.** We will come to you
- 3.** We send you a pack to draw around your tools

**The end result of all the options is a perfect Shadow Foamed tool kit.**

Shadow Foaming® is the perfect approach to tool organisation.

Shadow Foaming® is durable and designed to withstand daily use. It can be shaped to fit your tools, to allow safety and to keep your tools organised. The two toned foam used to produce Shadow Foaming® allows you to spot instantly when a tool is missing, making it easy to check at the end of the day that you have all of your tools together in one place.

# Design your own Tool Kit

## Designing your own kit could not be easier...

**1.** Choose the case or cabinet you would like.

**2.** Choose the individual tools from our wide selection of tools.

**3.** Send to us to receive a quote and design.

We will come back to you quickly with a price. We will also let you know about any extra options that are available to you, should you want them.

Once agreed, we will go ahead and create the design for your customised Tool Kit.

Designing your own kit allows you to have the perfect Tool Kit to suit your needs. We have a range of different cases including:

- HD Rigid Cases
- HD Rigid Cases With Draws
- Metallic Boxes
- Trolleys
- Canvas Cases

# Tool etching and foam etching

For enhanced tool control add foam etching and tool etching to your kit

For a higher level of tool control we offer tool etching where each tool can be etched with a code or name. Even the smallest sockets can have a code etched on them. Simple request tool etching when placing your order.

We also offer foam etching to assist with tool replacement. We etch the code of the tool on the foam. If the tool happens to go missing, a replacement tool can be ordered with ease.

# Predesigned Tool Kits

Using high quality, 2 colour, skydrol resistant foam in various tool chests, cases and cabinets we produce industry standard Tool Kits.

Our kits have been designed by the engineers that use them. From avionics kits to aircraft specific kits, our tool control kits are used by leading airlines, MRO's and military organisations across the world.
